PROFILE SUMMARY

Dedicated Cybersecurity Analyst and Blue Team enthusiast with hands-on experience in SOC operations, incident response, network packet analysis, and web application security. Proficient in monitoring, threat detection, log analysis, and malware triage using tools like Splunk, Wireshark, and Burp Suite. Passionate about leveraging automation, machine learning models, and security frameworks like OWASP Top 10 and MITRE ATT&CK to protect enterprise infrastructures.

SKILLS

- **Security Tools & Platforms:** Splunk (SIEM), Wireshark, Burp Suite, Nmap, Metasploit, EDR, YARA, SOAR, Sandbox Analysis, VirusTotal, Git, GitHub
- **SOC & Security Operations:** Blue Team Operations, Threat Intelligence, Incident Response, Log Analysis, IDS/IPS, Malware Triage, Phishing Detection
- **Frameworks & Methodologies:** OWASP Top 10, MITRE ATT&CK Framework, Basic Red Team Concepts
- **Networking & OS Security:** TCP/IP, DNS, HTTP/S, Firewalls, Network Scanning, Packet Analysis, Linux (Kali, Ubuntu), Windows
- **Programming & Web Technologies:** Python, JavaScript, HTML, CSS, SQL, XSS Analysis, SQL Injection
- **Hands-on Labs:** PortSwigger Web Security Academy, Hack The Box (HTB), TryHackMe, CTF Challenges, Lets Defend labs and challenges

PROJECTS

AI-Powered Phishing Detection System

[\[GitHub Code\]](#)

- Co-developed a machine learning-based detection tool designed to identify malicious URLs and phishing emails.
- Analyzed email headers, domain traits, and content patterns to minimize false positives during threat intake.
- Implemented feature extraction logic using Python to preprocess incoming datasets for model training and evaluation.

Caesar Cipher Encryption & Decryption Tool

[\[GitHub Code\]](#)

- Developed a lightweight cryptographic utility to perform character shifting encryption and decryption.
- Demonstrated fundamental concepts of data confidentiality, symmetric key mechanisms, and input validation.

Password Strength Checker

[\[GitHub Code\]](#)

- Built an interactive assessment tool to evaluate password complexity based on character sets, entropy, and length.
- Provided actionable feedback to users for enhancing credential security and resisting brute-force/dictionary attacks.

CERTIFICATIONS

- **Google Cybersecurity Professional Certificate** – Coursera [\[Certificate\]](#)
- **SOC Analyst Learning Path** – LetsDefend [\[Certificate\]](#)
- **Cisco SOC Operations** – Coursera [\[Certificate\]](#)
- **Cybersecurity Analyst Job Simulation** – Tata [\[Certificate\]](#)
- **XSS Survival Guide** – Udemy [\[Certificate\]](#)
- **Introduction to Cybersecurity** – Cisco [\[Certificate\]](#)
- **Getting Started with Cisco Packet Tracer** – Cisco Networking Academy [\[Certificate\]](#)

EDUCATION

Bachelor of Technology (B.Tech) in Information Technology

Nov 2022 – May 2026

Hindusthan College of Engineering and Technology, Coimbatore, Tamil Nadu, India
